

Enrollments by Tier Level

A New Report For Quick Turn
Around Course Enrollment Data

Enrollment Management

- A key process for departmental, college, and university administrators and staff
- Brings together different functions: recruiting, funding, tracking, retaining, and replacing students
- Student data resources support coordinated research and planning efforts

Data Informs Enrollment Management

- Admissions uses data to set goals for attracting and retaining great students
- Analysis of trends in majors helps shape new directions in instructional offerings
- Reviewing “re-enrollment” info can help create strategies and interventions
- Instructional performance data can show a “return on investment” to students, parents, and the public

Sometimes You Just Need The Numbers

- Planning meeting is coming up and the Dean wants a chart showing enrollments by tier level over the past two years.
- Accreditation report is due and current quarter counts by main course numbers are needed.
- Faculty Committee request statistics.

1st Step – Decide Which Data Tools to Use

- Direct data access using SQL and a data analysis package
 - This is an advanced and very technical task and may not be in your repertoire
- eReports based Course Analytics pre-built queries and pivot reports
 - Same data, simpler interface
 - Five tools to pick from that focus on different views of the data
 - Today we are focusing on a new report that provides quick access to enrollment counts by course
 - You can import data into a spreadsheet and use Excel to format

New Report Demo

- This report will become available in production starting Mon., November 14th.
- All current CA users will receive access.
- This report is simple and direct.
- More details and drill down data are available in the other reports.
